

Native Instruments announces give-away of a trip to Sónar festival to meet Mostly Robot

Chance to win a trip to see the world premiere appearance of Mostly Robot at Sónar festival, Barcelona

Berlin, May 16th, 2012 – Native Instruments is offering a chance to win a trip for two people to witness the debut performance of Mostly Robot on June 14th at Sonar Barcelona. The lottery is open to everyone, and the winners will enjoy a four day break in Barcelona – featuring flights, accommodation, two full festival passes and a tapas meal with the band.

Mostly Robot is a band conceived by Native Instruments, featuring five exceptional musicians who each represent a different area of the company's musical expertise. The artists – Jamie Lidell, Tim Exile, Jeremy Ellis, Mr Jimmy and DJ Shiftee – will perform in a truly 'live' format, with each musician playing independently of the other, synced only by the human element. The music will be accompanied by an inventive visual concept from Berlin's design collective Pfadfinderei.

Anyone wishing to enter the lottery can do so on the following page:

About Native Instruments

Native Instruments is a leading manufacturer of software and hardware for computer-based music production and DJing. The company's mission is to develop innovative, fully integrated solutions for all professions, styles and genres. The resulting products regularly push technological boundaries and open up new creative horizons for professionals and amateurs alike.

Native Instruments opened up the fascinating world of real-time sound synthesis on standard computers in 1996, and today offers an extensive product range for musicians, producers and DJs. The company currently employs around 300 people in its two offices in Berlin and Los Angeles, and works closely with more than 40 international distribution partners to ensure its future growth and success.
