## **Native Instruments Introduces SCARBEE PRE-BASS Amped**

**Additional version of the Kontakt-Powered software instrument provides  
production-ready bass tones in four distinctive amp flavors**

Berlin, October 26th, 2009 – Native Instruments today introduced SCARBEE PRE-BASS Amped, an additional version of the PRE-BASS software instrument that provides a meticulous, highly musical rendition of the iconic Fender Precision bass, recorded through a selection of distinctive amplifiers. PRE-BASS Amped is derived from the acclaimed Scarbee Blue Bass library, and offers production-ready bass tones for a variety of styles and genres.

SCARBEE PRE-BASS Amped expands on the already available PRE-BASS instrument by providing additional versions of the instrument recorded through four different amplifiers, offering distinctive characteristics perfectly suited for a variety of musical styles. Available in Fat, Heavy, Crunchy, and Pop versions, the bass tones in PRE-BASS Amped range from warm, round and tight to crispy, hard, and even slightly distorted types.

The “Amped” version offers the same level of detail as the previously released PRE-BASS instrument, with all four strings expertly sampled in nine velocities through each of the amplifiers, resulting in 12 GB of sample material. Powered by the industry-leading KONTAKT engine, PRE-BASS Amped is playable via the free KONTAKT PLAYER as well as the full KONTAKT sampler.

### **Pricing and availability**

SCARBEE PRE-BASS Amped is available for purchase in the NI Online Shop for \$119 / 99 €.

### **Further product information and press material**

## **About Native Instruments**

Native Instruments is a leading manufacturer of software and hardware for computer-based music production and performance. The company's mission is to develop innovative, fully integrated solutions for all professions, styles and genres. The resulting products regularly push technological boundaries and open up new creative horizons for professionals and amateurs alike.

Native Instruments opened up the fascinating world of real-time sound synthesis on standard computers in 1996, and today offers an extensive product range for the Instruments, Guitar and DJ markets, designed and developed by three corresponding divisions within the company. Native Instruments currently employs more than 150 people in its two offices in Berlin and Los Angeles, and works closely with more than 40 international distribution partners to ensure its future growth and success.
