Native Instruments releases REAKTOR ANIMATED CIRCUITS

New KORE SOUNDPACK provides limitless supply of soundscapes based on REAKTOR sound generators; includes innovative “Spiral” sequencer

Berlin, October 2nd, 2008 – Native Instruments today released REAKTOR ANIMATED CIRCUITS, a new KORE SOUNDPACK that explores the world of complex self-generating soundscapes, textures and rhythms. Powered by several highly advanced REAKTOR-based sound generators including the innovative “Spiral” sequencer, REAKTOR ANIMATED CIRCUITS provides a literally endless resource of unique atmospheric sound material for various electronic music styles, movie and game scoring, art projects, and more.

The sonic arsenal of REAKTOR ANIMATED CIRCUITS is based on 200 carefully designed KoreSounds that take advantage of the unparalleled capabilities of the REAKTOR engine embedded in KORE 2 and the free KORE PLAYER. The unconventional REAKTOR sound generators “Newscool”, “Metaphysical Function”, “Spacedrone” and “Skrewell” are utilized to produce deep, constantly fluctuating soundscapes that range from dark to meditative and from moody to abstract.

REAKTOR ANIMATED CIRCUITS also introduces the new sequencing instrument “Spiral”, the latest creation of REAKTOR master builder Lazyfish, based on a highly unusual and inspirational approach to pattern generation. Spiral uses concentric sequencing lanes and advanced algorithms to create continuously shifting, kaleidoscopic melodies, and can be routed into any sound source that accepts MIDI input.

All sounds in REAKTOR ANIMATED CIRCUITS offer powerful sound shaping options through eight morphing-capable Sound Variations per preset, with crucial sound parameters also conveniently assigned to the unified KORE user interface. Owners of REAKTOR 5 get full access to the panels of the individual ensembles for full control of every single sound parameter.

The Spiral ensemble is also available separately as a free download for all owners of REAKTOR 5 through the NI Service Center application.

Pricing and availability

REAKTOR ANIMATED CIRCUITS is available for download purchase in the NI Online Shop for a suggested retail price of \$59 / 49 €.

About Native Instruments

Native Instruments is the pioneer and market leader in the field of software instruments, and one of the key players in the market of computer-based audio production technology. The company's mission is to develop outstanding musical tools for all styles and genres. The resulting products regularly push technological boundaries and open up new creative horizons for professionals and amateurs alike.

Native Instruments opened up the fascinating world of real-time sound synthesis on standard computers in 1996, and today offers an extensive product range for the Instruments, Guitar and DJ markets, designed and developed by three corresponding divisions within the company. Native Instruments currently employs more than 150 people in its two offices in Berlin and Los Angeles, and works closely with more than 40 international distribution partners to ensure its future growth and success.
