## **Native Instruments introduces REAKTOR SPARK**

**New KORE SOUNDPACK is based on unique performance synthesizer, designed by NI founder and REAKTOR mastermind Stephan Schmitt**

Berlin, December 4<sup>th</sup>, 2008 – Native Instruments today introduced REAKTOR SPARK, a KORE SOUNDPACK based on the new “Spark” performance synthesizer designed by NI founder and REAKTOR mastermind Stephan Schmitt. With a strong focus on distinctive tone and genuine musical expressiveness, REAKTOR SPARK is both an outstanding library addition for REAKTOR users as well as a powerful instrument and sound library for KORE 2 and the free KORE PLAYER.

Spark was designed by Stephan Schmitt as a personal project over the course of three years, with the goal to create a synthesizer with a highly energetic sound character and maximum potential for real-time expression. Completely realized in Native Instruments’ groundbreaking modular synthesis studio REAKTOR, Spark expertly combines powerful subtractive synthesis with a sophisticated array of internal feedback loops and various other special sound shaping features. This allows its distinctive sonic output to cut through any musical arrangement with vivid, animated and organic tones, which are especially gratifying when played live with a keyboard and a set of real-time parameter controls.

The REAKTOR SPARK sound pack built around Spark makes this powerful synthesizer conveniently accessible for users of KORE 2 and the free KORE PLAYER, providing 200 versatile presets as well as intuitive sound tweaking options through the unified KORE interface. Owners of REAKTOR have access to the full set of Spark’s parameter and control elements, and can also explore and modify the complete signal flow structure of this extraordinary instrument.

### **Pricing and availability**

REAKTOR SPARK is available for download purchase in the NI Online Shop for a suggested retail price of \$59 / 49 €.

### **Further product information and press material**

### **About Native Instruments**

Native Instruments is the pioneer and market leader in the field of software instruments, and one of the key players in the market of computer-based audio production technology. The company's mission is to develop outstanding musical tools for all styles and genres. The resulting products regularly push technological boundaries and open up new creative horizons for professionals and amateurs alike.

Native Instruments opened up the fascinating world of real-time sound synthesis on standard computers in 1996, and today offers an extensive product range for the Instruments, Guitar and DJ markets, designed and developed by three corresponding divisions within the company. Native Instruments currently employs more than 150 people in its two offices in Berlin and Los Angeles, and works closely with more than 40 international distribution partners to ensure its future growth and success.
