

## **Native Instruments introduces CAVERN FLOOR MASCHINE Expansion**

**New MASCHINE Expansion delivers the sound of modern techno with  
extensive samples processed using cutting-edge sound design techniques**

Berlin, November 10, 2015 – Native Instruments today introduced CAVERN FLOOR – a new MASCHINE Expansion aimed at modern techno producers and musicians interested in the world of deep sound design. The expansion features an extensive set of samples that were curated and processed using the latest sound design techniques, as well as effects kits and new presets for some of NI's most acclaimed synths. CAVERN FLOOR runs in the latest MASCHINE software on MASCHINE STUDIO, MASCHINE, or MASCHINE MIKRO and is available exclusively at the NI Online Shop.

CAVERN FLOOR was created to appeal to the growing culture of musicians deeply interested in modern sound design. A selection of today's finest drum machines were sampled, then layered with hard-hitting acoustic drum and percussion layers. Legendary synthesizers selected for their gritty and raw sound were also used to provide melodic content. All these sounds were re-amped through rotary speakers, guitar cabinets, and more using top-quality microphones, then processed with select outboard gear. Adding to the extensive sample set in CAVERN FLOOR are exclusive new presets for NI's acclaimed MASSIVE and PRISM synths, as well as the MASCHINE 2 Drum Synths.

### **Pricing and availability**

CAVERN FLOOR is available now at the NI Online Shop for \$49 / 49 € / £44 / ¥ 6,280 / AU\$ 79 and runs in the MASCHINE 2 software.

### **About Native Instruments**

Native Instruments is a leading manufacturer of software and hardware for computer-based music production and DJing. The company's mission is to develop innovative, fully integrated solutions for all professions, styles and genres. The resulting products regularly push technological boundaries and open up new creative horizons for professionals and amateurs alike.

Native Instruments opened up the fascinating world of real-time sound synthesis on standard computers in 1996, and today offers an extensive product range for musicians, producers and DJs. The company currently employs more than 400 people in its offices in Berlin, Los Angeles, Tokyo, Shenzhen, and London and works closely with more than 40 international distribution partners to ensure its future growth and success.

*MASSIVE was designed and developed entirely by Native Instruments GmbH. Solely the name Massive is a registered trademark of Massive Audio Inc., USA.*
