

NATIVE INSTRUMENTS Releases MASCHINE Software Update 2.6.5

Free software update introduces new Ideas View for easy mixing and matching

May 18, 2017, Berlin - Native Instruments today releases the MASCHINE 2.6.5 software update, available free for all MASCHINE 2 customers. The update introduces Ideas View, a new layout that lets users build Scenes by mixing and matching patterns independent of the timeline. MASCHINE users can now experiment with new beats, vamps, and fills, or audition melodies and alternate between elements to find combinations they like. The update also features enhanced plug-in integration to trigger Scenes, making it easier than ever to try out ideas and find cool arrangements directly from the DAW via MIDI.

Additionally, in MASCHINE 2.6.5 users can load new Groups on the fly while audio and MIDI routings remain intact. Since every sound plays on its own previously mapped channel, users are now able to audition sounds for patterns or record alternate takes into a DAW, without losing settings.

Pricing and availability

MASCHINE 2.6.5 is available free for MASCHINE 2 owners to download via Native Access.

About Native Instruments

Native Instruments is a leading manufacturer of software and hardware for computer-based music production and DJing. The company's mission is to develop innovative, fully integrated solutions for all professions, styles and genres. The resulting products regularly push technological boundaries and open up new creative horizons for professionals and amateurs alike.

Native Instruments opened up the fascinating world of real-time sound synthesis on standard computers in 1996, and today offers an extensive product range for musicians, producers and DJs. The company currently employs more than 400 people in its six offices in Berlin, Los Angeles, Tokyo, London, Paris, and Shenzhen and works closely with more than 40 international distribution partners to ensure its future growth and success.
